■ Portfolio Website - Hariharan Thiyagarajan

This repository contains the source code for my personal portfolio website. It showcases my education, skills, projects, certifications, honors, and contact details. The site is built using **HTML, CSS, and JavaScript** with smooth animations, glassmorphism effects, and a background video.

■ Features

- Responsive design with smooth animations
- Glassmorphism UI with frosted glass effects
- Background video with overlay
- Smooth scroll navigation
- Sequential reveal animations for sections and list items
- Sections: About, Education, Experience, Skills, Projects, Certificates, Honors, Languages
- Footer with email, phone, GitHub, LinkedIn, and resume download link

■ File Structure

- index.html - Main structure of the portfolio website
- home.css - Stylesheet with glassmorphism, animations, and responsive design
- home.js - JavaScript for smooth scrolling and reveal animations
- samplevdo.mp4 - Background video (placeholder)
- fallback.jpg - Fallback image if video is not supported

■■ Setup Instructions

- Clone this repository: `git clone https://github.com/your-username/portfolio.git`
- Navigate to the project folder: `cd portfolio`
- Open `index.html` in your preferred browser
- Replace `samplevdo.mp4` and `fallback.jpg` with your own background video and image

■ Deployment

You can deploy this portfolio website using GitHub Pages, Netlify, or Vercel. Simply push your repository to GitHub and enable GitHub Pages in repository settings, or connect it to Netlify/Vercel for automatic deployment.
